

VCU Europa and Manvik sign Cooperation Agreement

Steve Morris (L) GM,VCU Europa and Wayne Byrne (R) MD, Manvik Group, sign cooperation agreement

August 2008

VCU Europa, the Berkshire based In Vessel Composting system supplier is pleased to announce that it has entered into a collaborative sales and distribution agreement with Manvik Group.

The non-exclusive agreement which covers the UK and Ireland further expands VCU Europa's distribution network and allows Manvik access to this key technology.

"We chose VCU because of its proven track record in this growing market" said Group MD Wayne Byrne. "The agreement is an important part of our organic/food waste strategy and we see considerable value in the provision of a full suite of plant to address collection, handling and processing".

“As the need for more sustainable waste disposal routes continues to grow globally, in vessel composting is increasingly seen as an important way to meet the ever-more stringent targets” commented VCU Europa’s General Manager, Steve Morris. “This is an exciting development for us, and we look forward to expanding our existing footprint by accessing new opportunities with VCU™ technology included as part of Manvik’s multi product offer.”

EDITORS NOTES:

The **Vertical Composting Unit (VCU™)** is a market leader in In-Vessel Composting. The VCU™ was the first In-Vessel system to be accredited to the EU Animal By-Product Regulation and now has more In-Vessel composting sites in the UK than any other technology.

The **VCU™** has flexible capacity, 1,500-40,000tpa; no odour due to self-biofiltration; a vertical design which means a small footprint; low maintenance and delivers a high quality end product. For further information contact Peter Hallam peterh@vcutechnology.com
