## VCU EUROPA EXPANDS FOOTPRINT IN SCOTLAND

### *Billy Bowie orders VCU™ In Vessel Composting system*

VCU Europa, are delighted to announce that **Billy Bowie Special Projects** have ordered the VCU™ system as part of their new composting facility based in Kilmarnock.

This will bring the total number of sites in Scotland operating VCUs to three, treating a variety of animal by product wastes.

“The VCU™ will be part of the new Waste Transfer Station within the site at Moorfield Industrial Estate, and will enable us to expand our waste disposal facilities for domestic and commercial customers alike. The expansion of the recycling facility as a whole will be a benefit to the whole community” says owner Billy Bowie. “We selected a VCU™ system for its modular design and expansion potential which is important to us as our business grows. VCU Europa’s help in securing initial planning consent assisted greatly in moving the project forward”.

Bowies will operate the facility which has been designed to take a range of commercial and waste streams including animal by-products produced by the fish and food industries.

“We are delighted to have secured this contract” says Peter Hallam, VCU Europa’s Project Development Manager. “We look forward to working with Bowies over the coming months to ensure the successful delivery of the project and to ensure that our reputation as leaders in the field of animal by-product processing is maintained.”

## EDITORS NOTES:

Billy Bowie Special Projects Limited is a well established Scottish company providing a broad range of services and skills to local authorities and industry throughout the UK.

From its origins in 1991 with one vehicle, Billy Bowie Special Projects Limited has grown to one of the most modern fleets within the industry, based at Moorfield Industrial Estate, Kilmarnock.

The **Vertical Composting Unit (VCU™)** is a market leader in in-vessel composting. The VCU was the first in-vessel system to be accredited to the EU Animal By-Product Regulation and now has more in-vessel composting sites in the UK than any other technology.

**VCU Europa** designs, manufactures and installs VCU™ plant across Europe, with a proven track record of delivering successful projects for both the municipal and industrial markets. VCU Europa offers all aspects of project delivery including design, construction, planning, licensing and accreditation services. [www.vcutechology.com](http://www.vcutechology.com)

The VCU™ has flexible capacity, 1,500-40,000tpa; no odour due to self-biofiltration; a vertical design which means a small footprint; low maintenance and delivers a high quality end product. For further information contact Peter Hallam [peterh@vcutechnology.com](mailto:peterh@vcutechnology.com)
